

WebConfig

Browser-based Configuration Software

sightlogix
making outdoor video...*smarter*

Quick and Easy Device Set-up

WebConfig is an intuitive, browser-based interface for calibrating, configuring, and defining security policies for SightLogix devices. Built into all SightSensors and SightTrackers, WebConfig includes a range of innovations that reduce the time and effort to achieve unparalleled outdoor security.

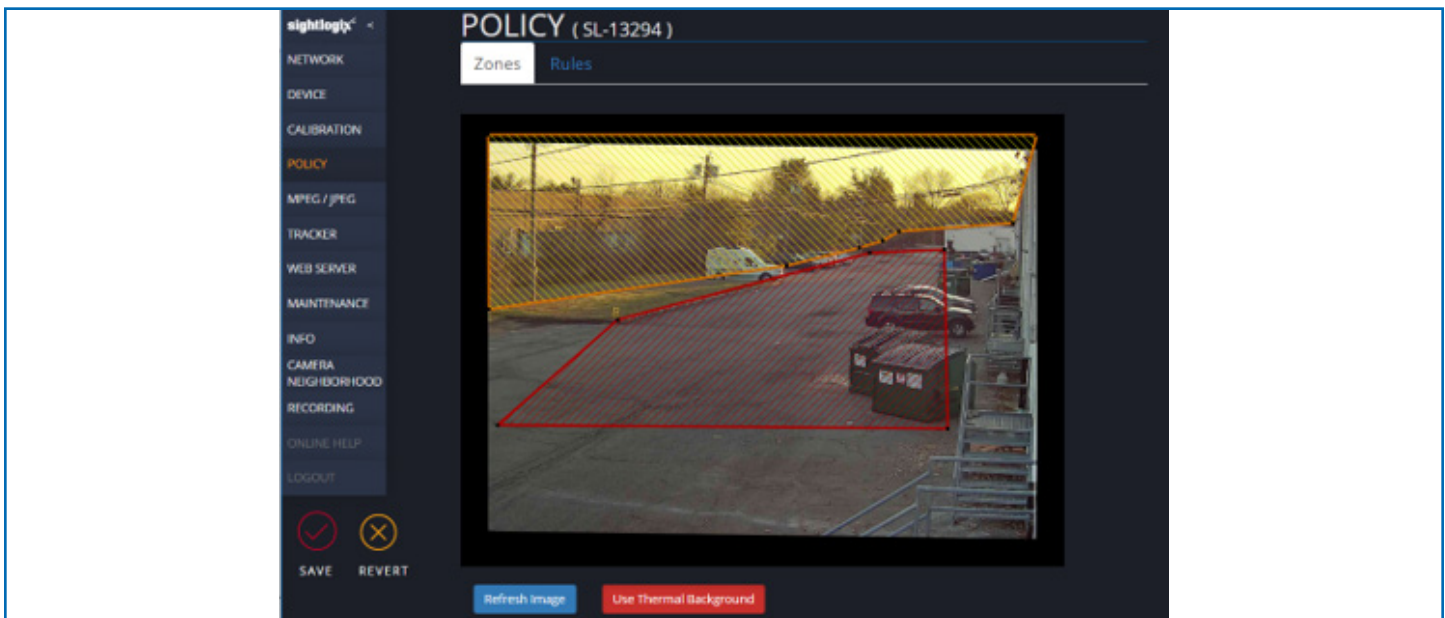

FEATURES

- ✔ Fast, simplified, guided setup
- ✔ One-click geo-calibration
- ✔ Point-and-click video analytics

BENEFITS

- ✔ Saves times, lowers costs, reduces complexity
- ✔ Outstanding detection performance in minutes
- ✔ Adaptable, flexible, site-specific policies

ADDITIONAL FEATURES

WebConfig is a powerful, GUI-based interface to calibrate, configure key parameters, and create video analytic detection rules quickly and easily. Additional features include:

- Automatic Size Calibration - Advanced processing automatically calculates the actual size of all objects in the field of view
- Seamless connectivity to VMS and Alarm Automation systems, with pre- and post-trigger video clips
- Recording Management - Filter, view and download alarm clips from onboard storage
