

Stop Theft and Vandalism with a Smart **Outdoor** Video Alarm System

If you have outdoor assets that you need to protect, a thermal video intruder system is now available that **detects**, **verifies**, and **notifies** responders to catch the bad guys in the act – and protect your business resources.

HOW IT WORKS

1. Our Remote Video partners assess your site to create a Security Plan.
2. Long-range sensors are installed to blanket your property with automated protection.
3. When an intruder enters a protected zone, an alarm with video is received by a Remote Monitoring Station.
4. They assess the situation, confirm the threat, and notifies responders.

Built for the Most Important Sites – Yours

Our system has been purpose-built to detect outdoor intruders - and help protect your critical business assets.

Proactive Security

Detects thieves the instant they breach the fence.

Construction Sites

Fenced Yards

Intelligent Protection

Smart sensors never tire, seeing through darkness, rain, wind or snow.

Vacant Buildings

Lumber & Building Supplies

Get More with Less

For the dollar, smart thermal sensors outperform - per square foot - any other detection technology.

Detect and Verify

Dual-video cameras use thermal to detect and color to quickly verify the event in progress.

Schools & Sports Fields

Building Roofs

Sensors Won't Cry Wolf

Our systems are built to detect people, not animals, trash, or trees.

Parking Lots

Copper Theft

Faster Police Response

Video-verified events get higher priority to catch bad guys in the act - reducing business loss.
